# What is a Routine Dam Safety Program?

**Integrates capabilities and expertise across the organization:**

- ✓ Allows USACE to ensure safe operations of dams
- ✓ Enables USACE to meet mission requirements
- ✓ Leverages USACE's local functional areas, relationships, and enterprise processes
- ✓ Helps assess overall health of Dam Safety Program

**FEMA**

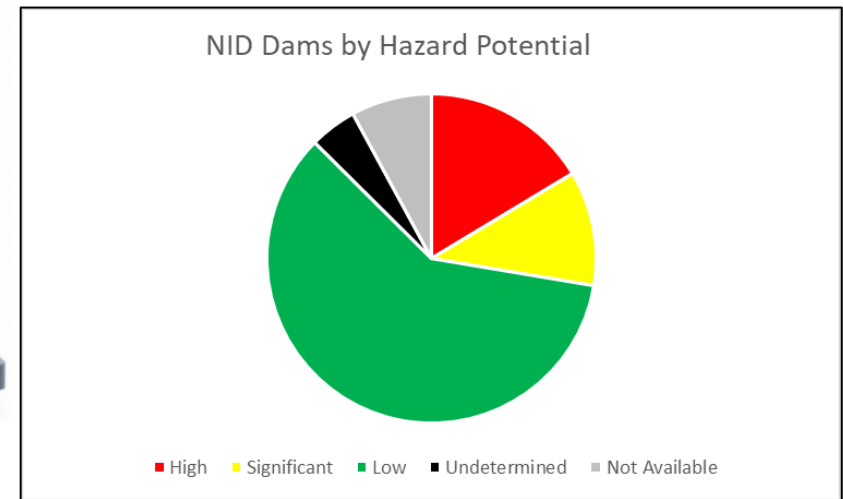

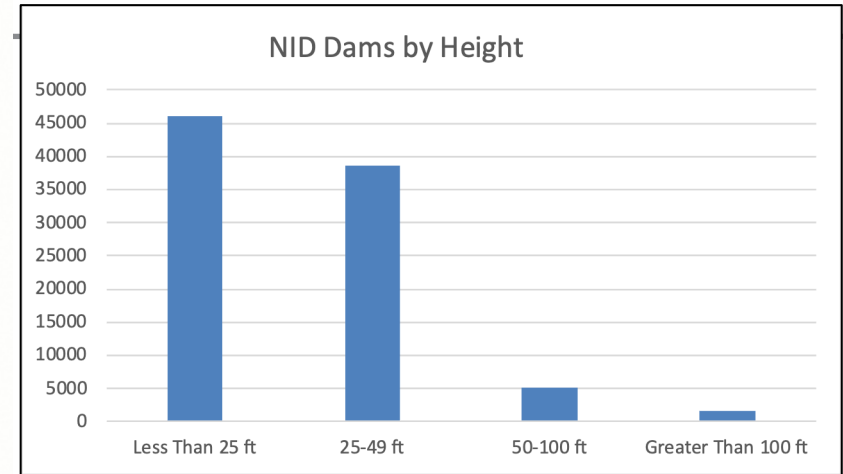

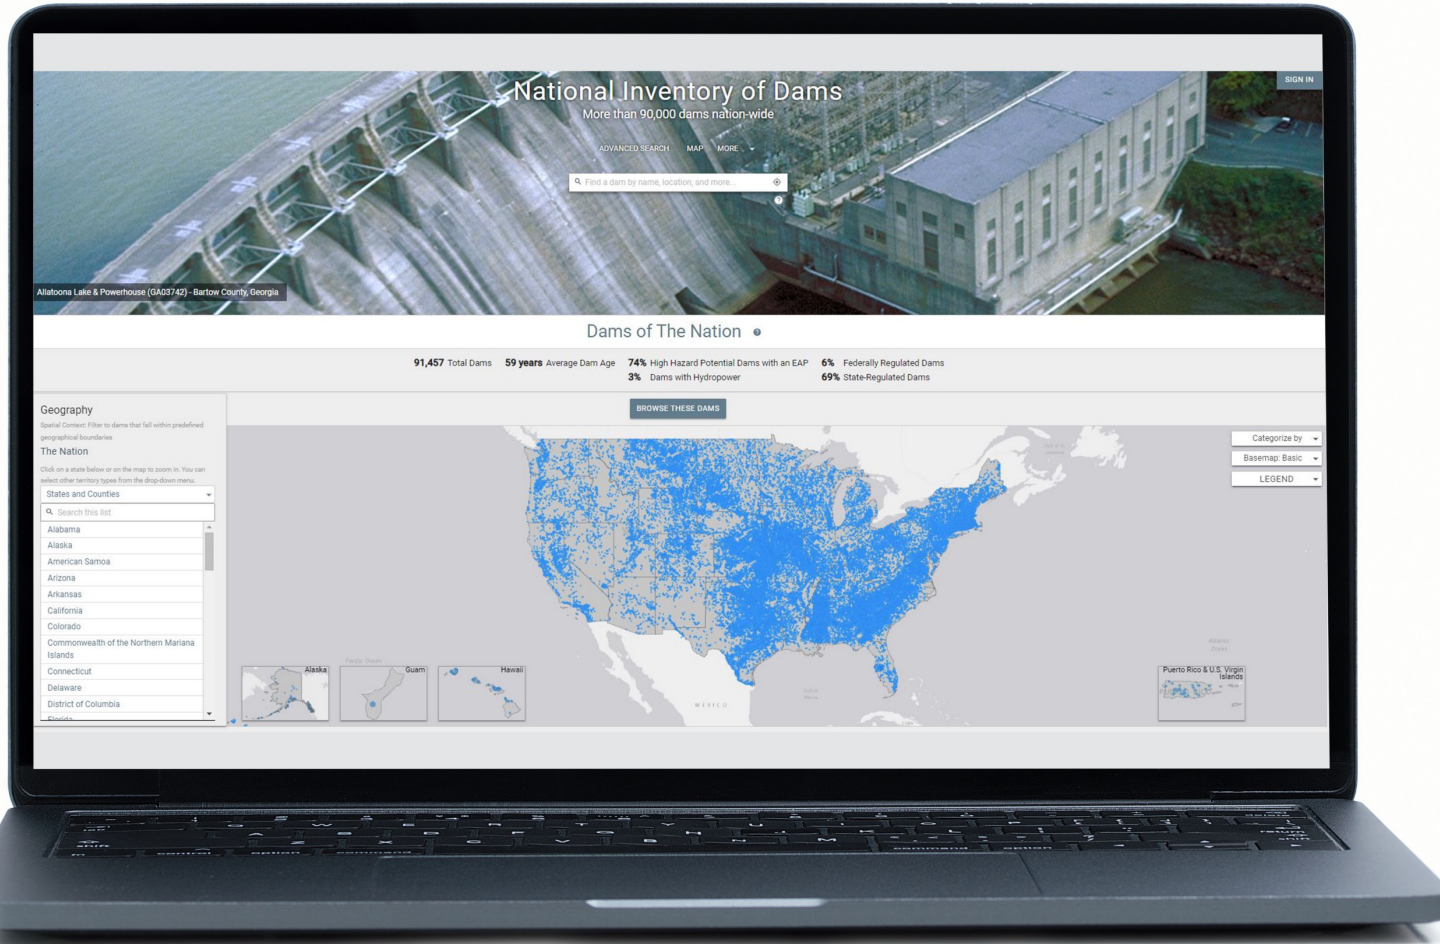

# Presentation Outline

---

- USACE Inventory of Dams
- History of USACE Dam Safety Scorecard
  - What it is
  - What it is not
- Recent changes to USACE Dam Safety Scorecard
  - Why make changes
  - How it is being used
- Conclusion

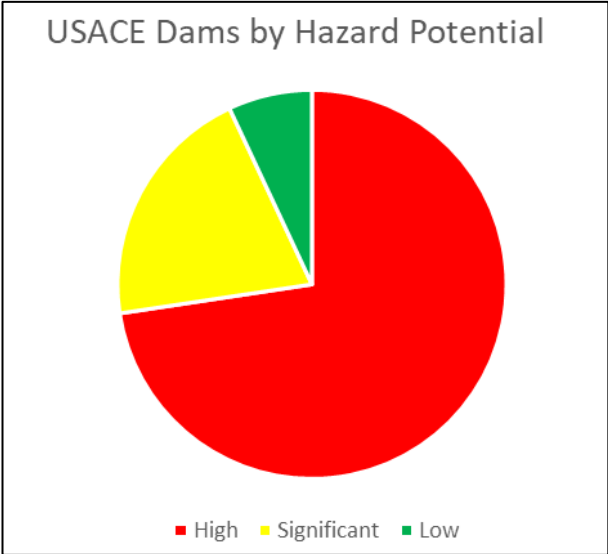

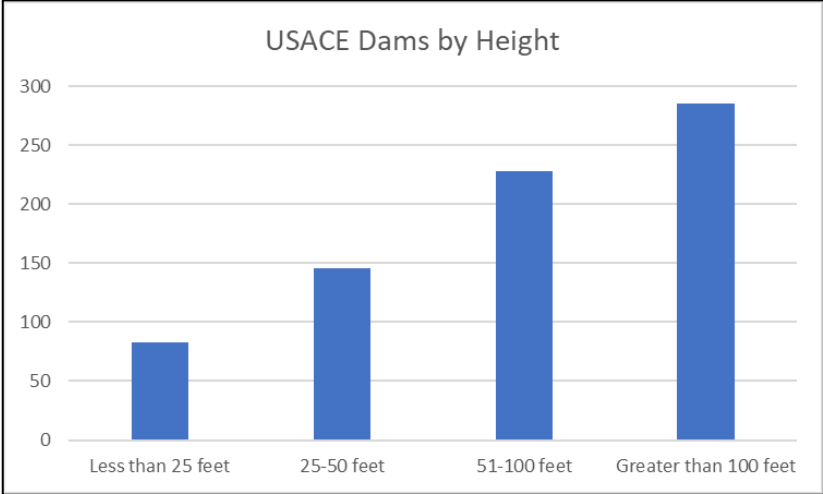

# National Inventory of Dams

FEMA

# USACE Inventory of Dams 1

FEMA

## USACE Inventory of Dams 2

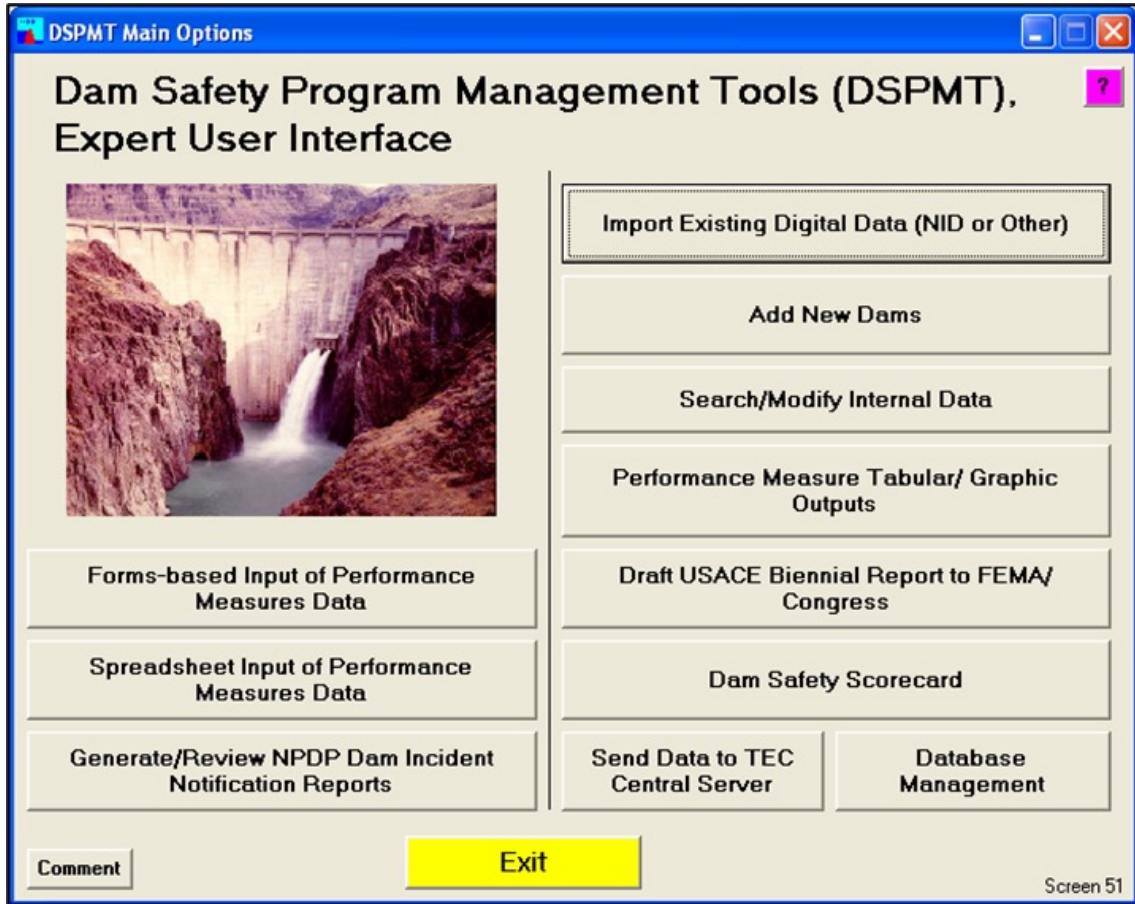

---

- USACE uses routine and non-routine activities to inform risk management decisions through the assessment, management, and communication processes.
- USACE has Dam Safety Officers and Dam Safety Program Managers at all levels of the organization.
- USACE is a self-regulated dam owner

**FEMA**

# History USACE Dam Safety Scorecard 1

- Documenting the condition and performance of USACE dams
- Tracking the status and progress of the implementation of the dam safety program
- Reporting information regarding the Agency's inventory of dams periodically to the National Inventory of Dams (NID), FEMA, and Congress

FEMA

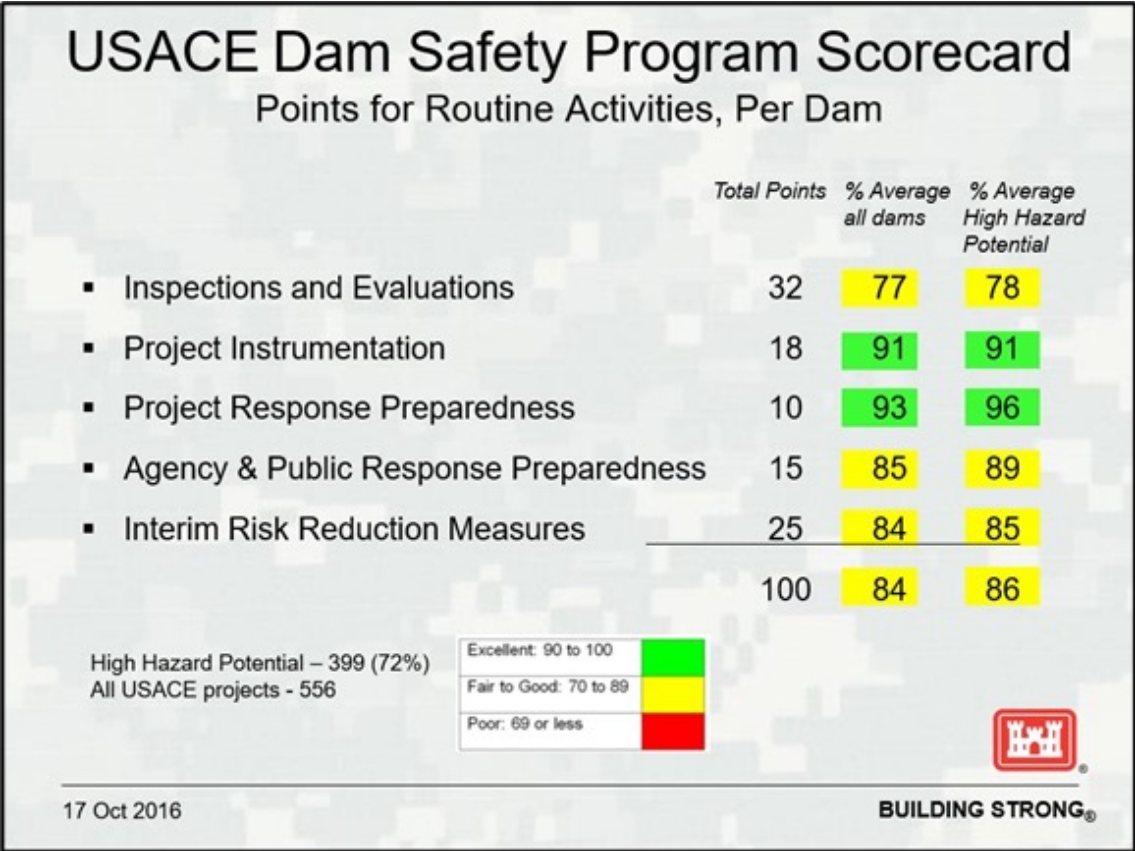

# History USACE Dam Safety Scorecard 2

- Staffing (DSPPM 2)
- Inspections and Evaluations (DSPPM 3)
- Identification and Remediation of Deficient Dams (DSPPM 4)
- Project Response Preparedness (DSPPM 5)
- Agency and Public Response Preparedness (DSPPM 6)

# History USACE Dam Safety Scorecard 3

## What it is:

Provides a numerical and graphical report of the implementation of routine dam safety activities on a per dam basis.

## What it is NOT:

Not used as an indicator of the dam’s condition nor to determine its risk or prioritization in the portfolio of dams

FEMA

# History USACE Dam Safety Scorecard 4

Inspections and Evaluations	Project Instrumentation	Project Response Preparedness	Agency and Public Response Preparedness	Interim Risk Reduction Measures	Total Score
30	18	10	15	25	100
32	18	8	15	25	98
32	16	10	15	25	98
32	18	8	15	25	98
32	18	8	14	25	97
32	18	8	14	25	97
32	18	8	14	25	97
32	18	10	10	25	95
32	18	10	10	25	95
32	18	10	9	25	94
32	18	10	9	25	94
32	18	8	10	25	93
32	16	10	10	25	93
32	16	10	10	25	93
32	18	8	9	25	92
32	18	8	9	25	92
32	18	8	9	25	92
29	16	10	10	25	90
29	16	10	10	25	90
32	18	10	8	25	88
23	18	10	10	25	86
23	16	10	10	25	84
23	16	10	10	25	84
23	16	10	10	25	84
23	18	8	15	15	73
32	18	8	15	15	73
23	16	10	15	15	73
32	18	8	14	15	72

- The numerical values assigned to each of the five sections are based on a series of questions for which points are awarded based on affirmative responses.
- If the user answers “Yes” to the scorecard questions, points are awarded; no points are awarded for “No” answers.
- The maximum score is 100 points.

# USACE Dam Safety Scorecard Changes 1

---

- Many of the questions and the 100-point structure have been in use since 2009.
- This long-term data collection allows USACE to see trends and compare/review data for more than 10 years.
- However, these metrics should be reviewed to ensure they are measuring the most important activities and granting the appropriate points.
- As USACE's understanding of the risks associated with its dams matures, the metrics evolve to capture the current priorities and guidance.

**FEMA**

## USACE Dam Safety Scorecard Changes 2

---

- Should the Scorecard be limited to 100 points?
- Do all categories need to apply to all dams?
- Do the five performance measures still make sense or should they be expanded to align with current program requirements and efforts more closely?
- Should the Scorecard be organized by the Tolerable Risk Guidelines (TRGs) or have a Scorecard for each TRG?
- What about current Risk Communication activities?

**FEMA**

# USACE Dam Safety Scorecard Changes 3

- Does not need to equal 100 points for every project and is better represented as a percentage for applicable items.
- If a metric does not apply for a project, it does not count towards that project's total.

FEMA

# USACE Dam Safety Scorecard Changes 4

- Districts include Scorecard discussions in their regional dam safety committee meetings and internal briefings on their highest risk dams.
- The Scorecards are useful when defending budget requests to highlight the need for funding items or activities that are not being accomplished.

FEMA

# Conclusion

---

- Due to the trust and funding bestowed by Congress through the U.S taxpayer, it is imperative that USACE demonstrate it is acting as a responsible dam owner.
- One of the ways it accomplishes this is through a self-monitoring series of questions and metrics upon which the overall health of the Dam Safety Program can be measured, reported, and improved.
- Should you consider a Scorecard that will assist in measuring how well you (or your organization) are implementing the Dam Safety Program?

**FEMA**

# Thanks for your attention.
