# 1. Introduction

Flooding is a serious risk to life and property in the United States that changes over time. The FEMA Risk Mapping, Assessment and Planning (Risk MAP) program helps communities learn and prepare for changing flood risks by updating flood maps. The new flood maps help officials review building codes and other standards that make residents, homes and businesses safer.

FEMA is required to review a community's flood maps every five years. The agency must then decide whether to update or change them. FEMA must also tell Congress every month about any planned changes to community flood maps. This Notice to Congress includes information about:

- Communities that (in the next three months) will receive updated draft maps from FEMA (called preliminary maps and revised preliminary maps).
- Communities that have received preliminary or revised preliminary maps from FEMA.
- When FEMA will publish community notices about the release of the maps and the appeal period.
- Communities that have received Letters of Final Determination (LFDs) about their updated maps.
- Communities whose maps are considered final (called effective maps).

This monthly Notice to Congress also includes Risk MAP program updates, news on community and flood risk best practices, and other topics.

## Risk MAP Vision

*"The vision for Risk MAP is to deliver quality data that increases public awareness and leads to action that reduces risk to life and property."*

### FEMA Region 3 Coffee Break Webinars Attract a Diverse Audience

In January and March, FEMA Region 3 hosted two Coffee Break webinars. “[Identifying and Prioritizing At-Risk Community Assets](#)” and “[Funding Your Hazard Mitigation Actions](#)” drew 415 attendees, including people from 23 states outside Region 3.

It is important to prioritize locally identified, at-risk community assets. You can use this to make a list of project options that will reduce hazard risk in communities. “Identifying and Prioritizing At-Risk Community Assets” talked about how to prioritize assets in the hazard mitigation planning process. The goal was to help people understand potential community impacts of hazards. FEMA Hazard Mitigation Assistance is a good source of mitigation funding, but more sources of funding are often needed. However, they are rarely pursued. “Funding Your Hazard Mitigation Actions” looked at how to use state and federal funding sources.

Region 3 has hosted the Coffee Break series since 2017. The webinars share risk reduction best practices. Attendees usually work in hazard mitigation, resilience or risk reduction planning. However, the content often applies beyond those sectors.

The region’s next Coffee Break will be on [Future Conditions and Hazard Mitigation Planning](#). It will show how climate change could affect your risk assessment and mitigation strategies.

### 3. Notification

The following table shows preliminary and revised preliminary flood mapping studies that FEMA expects to release in the current month and the next two months. An additional table shows the studies where FEMA issued preliminary or revised maps; started an appeal period; or released an LFD or effective maps. All tables show the applicable FEMA region, state and county. The tables also show the flood mapping study status and estimated or actual dates.

#### 3.1. Estimated Release of Preliminary Maps

FEMA has studied some of the communities within the counties listed below to depict their flood risk. Their flood hazards are shown in the preliminary flood maps and Flood Insurance Study (FIS) report. The table identifies when FEMA plans to deliver the preliminary flood map and FIS report to community officials.

The column called “Estimated Schedule of Community Meeting” shows when FEMA may schedule a community meeting to discuss the FIS and preliminary flood map. In some cases, several meetings are needed to cover all communities that were studied.

Finally, the column named “Estimated Public Notice and Starting Appeal Period” shows which quarter of the calendar year an appeal period starts in a study area. The appeal period starts after FEMA places the second notice in the local newspaper. In study areas with several communities, FEMA must place notices in multiple papers. This can sometimes lead to each community having a different publication date.

### 3.2. Estimated Release of Revised Preliminary Maps

In some cases, FEMA may issue a revised preliminary map to address changes to preliminary flood hazard determinations. They may also address a non-technical issue. The table below shows the studies for which FEMA plans to release revised preliminary maps. FEMA coordinates the actual release dates with the state and/or local governments.

The table below shows an estimate for the month the revised maps will be released. Community meetings, notices in local papers, and appeal period dates are not shown because these are often not needed for revised preliminary maps.

### 3.3. Actions Taken by FEMA

The table below shows the counties where FEMA released a preliminary flood map and FIS report. It also shows where FEMA began a 90-day appeal period, released a revised preliminary flood map and FIS report, or sent LFDs in the previous month. Counties where flood maps and FIS reports became effective during the previous month are identified.

### Information on “Preliminary and Revised Preliminary” Actions

For the flood risk studies shown above, FEMA gave copies of either the initial or the revised flood map and FIS report to all communities involved. Copies are also online at <https://msc.fema.gov/portal/search> and <https://msc.fema.gov/fmcy>.

Local officials should share their copies with residents, business owners, elected officials and others in the community. This can help add to or correct non-technical features such as layout and labeling of roads, bridges and streams. These types of changes can be made during the community review period, at a community meeting, and during the 90-day appeal period. FEMA will then update the final flood map and FIS report.

### Information on “Appeal Start” Actions

The National Flood Insurance Act limits the right to appeal the preliminary flood map and FIS reports. Appeals can be made by owners or renters of real property in a community who believe that their property rights are adversely affected. The affected community can also appeal.

Important information about appeals and comments can be found in FEMA’s “Guidance for Flood Risk Analysis and Mapping: Appeal and Comment Processing.” See [https://www.fema.gov/sites/default/files/2020-02/Appeal Comment Processing Guidance Feb 2019.pdf](https://www.fema.gov/sites/default/files/2020-02/Appeal%20Comment%20Processing%20Guidance%20Feb%202019.pdf).

### Information on “LFD Issued” Actions

A statutory 90-day appeal period was held, and FEMA resolved any appeals or comments received during that period. FEMA has sent the LFD to the chief executive officer of all affected communities, all individual appellants, and the state coordinating agency. FEMA also publishes the final flood hazard information in the *Federal Register*. The updated flood map panels will become effective six months after the LFD date. FEMA archives final flood maps and FIS reports on the Flood Map Service Center (MSC) website at <https://msc.fema.gov>.

Resources are available to help homeowners understand the importance of flood insurance. There are steps they can take to reduce their rate. For additional information about flood insurance, visit <https://www.fema.gov/flood-insurance>.

To view upcoming map changes, please visit the Flood Map Changes Viewer at <https://msc.fema.gov/fmcy>.

### Information on “Maps Effective” Actions

The updated flood map and FIS report issued by FEMA have become effective. Communities use effective flood maps to administer floodplain management regulations and mitigate flood damage. Local citizens use them to determine the flood zone for their property or structure. Lending institutions use them to determine whether flood insurance is required. Insurance rates may change once a flood map becomes effective. To view the effective flood maps, please visit the MSC at <https://msc.fema.gov/portal/search>.

The FEMA website at <https://www.fema.gov/flood-maps> has more flood mapping information and resources. The FEMA Mapping and Insurance eXchange (FMIX) can answer questions by telephone, toll free, at 1-877-336-2627 (FEMA MAP) or by email at [FEMA-FMIX@fema.dhs.gov](mailto:FEMA-FMIX@fema.dhs.gov). ## 4. LEGAL REQUIREMENTS

The Biggert-Waters Flood Insurance Reform Act of 2012 (Biggert-Waters), as amended by the Homeowner Flood Insurance Affordability Act of 2014, directs FEMA to notify Members of Congress when their constituents will be affected by a flood map update. Public Law 112-141, div. F, title II, §100216, July 6, 2012, 126 Stat. 927; Pub. L. 113-89, §§27, 30, Mar. 21, 2014, 128 Stat. 1033, 1034; 42 U.S.C. §4101b (d) (1)(G)(i) and (H) (2014). Under Biggert-Waters:

- The Administrator shall, not less than 30 days before issuance of any preliminary map, notify the Senators for each state affected and each Member of the House of Representatives for each congressional district affected by the preliminary map in writing of the estimated schedule for:
  - Community meetings regarding the preliminary map
  - Publication of notices regarding the preliminary map in local newspapers
  - The commencement of the appeals process regarding the map

See Biggert-Waters, as amended, at 42 U.S.C. §4101b (d)(1)(G)(i).<sup>1</sup>

Biggert-Waters also states:

- The Administrator shall, upon the issuance of any proposed map and any notice of an opportunity to make an appeal relating to the proposed map, notify the Senators for each State affected and each Member of the House of Representatives for each congressional district affected by the proposed map of any action taken by the Administrator, with respect to the proposed map or an appeal relating to the proposed map.

See Biggert-Waters, as amended, at 42 U.S.C. §4101b (d)(1)(H).

To meet these requirements, this document notifies Congress about studies with an estimated issuance of preliminary or revised preliminary flood maps in the current month and the next 2 months. It also lists preliminary or revised preliminary flood maps and/or LFDs that were issued last month.<sup>2</sup> FEMA issues LFDs to finalize the information on a preliminary flood map. This document also provides details on the required appeal periods that began and maps that went effective last month.<sup>3</sup>
