Take Additional Safety Measures

Get inside the nearest building to protect yourself from radiation. Brick or concrete are best. Bring any pets indoors.

Go to the basement or middle of the building. Stay away from the outer walls and roof because radioactive material will collect there.

Close windows and doors, If possible, turn off units that bring in air from the outside.

Stay inside for 24 hours unless local authorities provide other instructions. It is important to wait for the radiation to decay.

Listen for instructions from authorities.

Take Additional Safety Measures

If you were outside after the fallout arrived, **remove your outer layer** of clothing and put it away from people and pets. **Brush off** any fallout and, if possible, **wash** exposed skin and hair.

Family members and caregivers **should not leave** to get their children. Schools/Day cares have plans and are caring for your children. Reunite later to avoid exposure to dangerous radiation.
